SUNFLOWERBIZ

Email: info@sunflowerbiz.com

Web: www.sunflowerbiz.com

Installation:

From your base Magento2 directory -> app -> code (you may have to create this directory), create Sunflowerbiz directory to your app/code directory.

From the base Magento2 directory:

-Upload the contents of 'Base' and 'Alipay' folders to 'app/code/Sunflowerbiz' directory of your Magento installation

-Enable the module running the following commands on the root of your Magento installation:

bin/magento module:enable --clear-static-content Sunflowerbiz_Alipay

bin/magento setup:upgrade

The following commands should work even in windows with the forward slash swapped for back.

php bin/magento cache:clean

php bin/magento setup:upgrade

php bin/magento setup:di:compile

php bin/magento setup:static-content:deploy

SUNFLOWERBIZ

Email: info@sunflowerbiz.com

Web: www.sunflowerbiz.com

Module Setting:

1. Go to Admin Panel, navigate to STORES and click on Configuration.

2. **Expand SALES and choose Payment Methods in the dropdown.**

3. Set up Alipay.

1) Expand the **Alipay** section to start the configuration.

Title [store view]	<input type="text" value="Alipay / 支付宝"/>
Partner ID [store view]	<input type="text" value="xxx"/> <small>You can find Partner ID in alipay merchant center. This is a required field</small>
Seller Email [store view]	<input type="text" value="xxx@xxx"/> <small>Please fill the seller email which bind with your alipay merchant. This is a required field</small>
Private key [store view]	<input type="text"/>
Public key [store view]	<input type="text"/>
Hide Alipay in WeChat browser [store view]	<input type="text" value="No"/>
Enable Log [store view]	<input type="text" value="Yes"/> <small>When enable log, all transaction will be logged in /var/log/Alipay.log</small>

2) Fill out the **Partner ID**, and **Seller Email** that Alipay provides for you.

A) Log into [Alipay Merchant Platform](#) and click **Account Management**.

B) Click **View PID/Key**

Partner ID: enter 合作伙伴身份 (**PID**)

Seller Email: enter the **email address** you register to apply for the payment API.

C) Enable Log and Set the status

Enable Log: Enter **Yes** to enable the transaction log.

Order Status: Choose the status name when the payment is accepted or refused by Alipay.

Enable Log <small>[website]</small>	Yes	▼
When enable log, all transcation will be logged in /var/log/Alipay.log		
Order status when payment accepted by Alipay <small>[website]</small>	Processing	▼
Order status when payment refused by Alipay <small>[website]</small>	-- Please Select --	▼

D) Click on **Save Config** to complete all settings.

4. Upgrade MD5 to RSA.

Alipay upgrades the MD5 to RSA verification. Check more info [here](#).

Configure **"Private key"** and **"Public key"** in the module settings page to enable the RSA verification.

1) Generate the **Public Key** and **Private Key**. Read [more](#).

A) Download the **generation tool**

4. [WINDOWS](#)

5. [MAC_OSX](#)

B) Select **RSA2** and **PKCS1(非 JAVA 适用)**

C) Enter the **generated Private Key** as **Private Key** in the module setting page.

D) Upload the **generated Public Key** to get the **Alipay Public Key**.
