## Installation:

From your base Magento2 directory -> app -> code (you may have to create this directory), create the Sunflowerbiz directory to your app/code directory.

From the base Magento2 directory:

-Upload the contents of 'Base' and 'WechatOversea' folders to 'app/code/Sunflowerbiz' directory of your Magento installation

-Enable the module running the following commands on the root of your Magento installation:

```
bin/magento module:enable --clear-static-content Sunflowerbiz_WechatOversea  
bin/magento setup:upgrade
```

-----

The following commands should work even in windows with the forward slash swapped for back.

```
php bin/magento cache:clean  
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```
