Installation:

-From your base Magento2 directory -> app -> code (you may have to create this directory), create Sunflowerbiz directory to your app/code directory.

-From the base Magento2 directory, upload the contents of 'CategoryPassword' directory to 'app/code' directory of your Magento installation

-Enable the module by running the following commands on the root of your Magento installation:

```
bin/magento module:enable --clear-static-content Sunflowerbiz_CategoryPassword  
bin/magento setup:upgrade
```

The following commands should work even in windows with the forward slash swapped for back.

```
php bin/magento cache:clean  
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

Note: if one product is under multi-categories/subcategories, please make sure you set password for all related categories/subcategories, otherwise the product will not be password protected.

Session Time

This module uses magento system session to record password. Within the session time, customers don't need to enter password again.

You can set your magento system session time in

Stores->Configuration->Advanced->Admin->Security->Admin Session Lifetime

Notifications

1. **Support Magento 2.x**
2. **Support Magento Community and Enterprise.**
3. **If one product is under multi categories, it will be protected only if you set password to all related categories.**
